

# Bead Roller SFM620 from JS Tools

JS Tools has developed a bead roller in the same high quality and style as the famous KSM155PRO shrinker stretcher machine.

The new machine is from laser cut plates for the best precision and with a unique adjusting possibility of the upper shaft with 35mm of travel. This gives a possibility to make many, many more different profiles as you can mix not only the rolls but also the axial position relatively to each other.

The machine is easy to use and the rolls are easy and quick to change.

## SPECIFICATION:

---

Working depth:	24.1"	620 mm
Gap Height:	1.1"	28 mm
Adjusting travel of the upper shaft full	1.37"	35mm
Adjustable angle of the head:	30 degrees	
Max. sheet thickness, steel:	1.25 mm	
Max. sheet thickness, alu:	2 mm	
Electrical motor:	110/230 volts 50/60 Hz	
Forward and reverse:	by foot switch	
Revolutions on rollers:	13.6 Rpm.	

Delivered in cardboard box, complete with motor and pedal and user manual!
