LockJaw

Type: 10CJ

Size: 10" / 250 mm

Kap: 0 - 47 mm

LockJaw

Self-adjusting welding pliers. Suitable for fixating during welding, grinding and processing.

The pliers are one-handed making it equally easy locking and releasing with one hand. One finger easy release button that is rubber coated. Self adjusting clamps which grips firmly on both thick and thin materials. No need for adjustment regardless of the objects size.

Clamping pressure is adjustable from light pressure to extremely high, with an easy twist of the adjusting screw. Set the desired clamping pressure one time and you dont need to worry in the future.
